# Safetyspace® Filter Tips

Filter Tip to Protect from Contamination

## Product Information

Filter tips are an efficient way to avoid cross-contamination of your sample and/or pipette and reduce the need for pipette maintenance. Sartorius Safetyspace® Filter Tips have more space between the sample and the filter than conventional filter tips, which prevents the risk of the sample being absorbed into the filter. Safetyspace® Filter Tips are ideal for use with Sartorius pipettes, enabling maximum accuracy and precision.

## Description

Safetyspace® Filter Tips are made of virgin polypropylene and the filter of polyethylene without any self-sealing additives to avoid contamination of the sample, which may affect the results. All the steps in the manufacturing process strictly follow ISO 9001 and ISO 13485 quality standards, and the tips are manufactured in ISO 8-classified cleanroom conditions to avoid any contamination. Safetyspace® Filter Tips are certified and tested for DNase, RNase, human DNA and endotoxins. The tips are released for sale once they have fulfilled the test requirements. Certificates are available at **www.sartorius.com**. The additional space between the sample and the filter differentiates Safetyspace<sup>®</sup> Filter Tips from other filter tips. This feature is particularly useful in reverse pipetting, pipetting foaming liquids (such as buffers and proteins), or when using Multi-Dispensing mode in electronic pipette.

### Features

- Available in volumes from 10 to 5,000  $\mu$ L
- Tips are tested and certified to be free of DNase, RNase, human DNA and endotoxins
- Informative rack labels indicating tip volume, product number, lot number, date, and purity level for improved tip identification and traceability
- All Safetyspace® Filter Tips are E-beam pre-sterilized
- Perfect fitting and sealing with all Sartorius pipettes
- Smooth and ergonomic tip attachment and ejection ensured by compatibility with the spring-loaded Optiload mechanism of Sartorius pipettes
- Color-coded tip trays make it easy to match tip with appropriate Sartorius pipette
- Available in Single Tray flip-top racks that are easy to open and close with one hand
- Materials used in tips, trays, and racks are 100% recyclable or can be incinerated as energy waste

The Sartorius tip offering also includes Optifit nonfiltered tips (see catalog or datasheet for details).

## Applications

- Molecular biology
- Microbiology
- Cell culture applications
- Radioactive work
- Any application where preventing cross-contamination is vital

It is recommended that Safetyspace<sup>®</sup> Filter Tips are used with Sartorius pipettes to ensure optimum compatibility and performance.

### Technical Data

Technical Specifications*		
Sterilization	Electron beam (beta irradiation) in accor- dance with EN 552 and ISO 11137 and validated by using 25 kGy as the minimum dose with SAL (sterility assurance level) of 10 <sup>-6</sup> .	
Purity certificate	Tips are tested and certified to be free of DNase, RNase, human DNA and endotoxins	
Endotoxin purity testing	Validated test result with Chromogenic kinetic method according to Ph.Eur. 2.6.14 Method D for endotoxin free pipette tip is < 0.005 IU/mL (EU/mL).	
DNase purity testing	DNase-free pipette tips show no evidence of DNase activity in the fluorometric assay with the detection level of $< 6.25 \times 10^{-5}$ U/µL when DNase I is used as a standard.	
RNase purity testing	RNase-free pipette tips show no evidence of RNase activity in the fluorometric assay with the detection level of $<1*10^{\circ}$ U/µl.	
Human DNA purity testing	Human DNA free pipette tips show no evi- dence of human DNA in quantitative PCR (qPCR) using human DNA specific primers and with a detection level of <1 pg/µl.	
Standards	ISO 9001 Quality management standard ISO 14001 Environmental standard ISO 13485 Medical device quality management standard ISO 14644-1 Class 8 cleanroom manu- facturing standard	
Autoclavability	No	
Transportation conditions	Temperature: -50 °C to +50 °C Humidity: 10% - 90% Shocks: < 10 G	
Storage conditions	Storage in room temperature is recommended	
	Temperature: -20°C to +40°C Humidity: 10%-60%	
Filter pore size		

Materials and Recylability Polypropylene (PP) Tip Recyclable, can be incinerated as energy waste Polyethylene (PE) Polyethylene (PE) Recyclable, can be incinerated as energy waste Tray and Rack Polypropylene (PP) Recyclable, can be incinerated as energy waste Cardboard Cardboard package Recyclable, renewable waste

Package Options

Single Tray racks purity-certified tip racks

\* Extended filter tip sterility assurance level, DNase, RNase, human DNA and endotoxin testing detection limits may differ from values reported here. You can find batch specific certificates at www.sartorius.com
