DATASHEET | **PART NUMBER** 923041

Shortly serological pipette 25ml sterile individually wrapped Clearline

- Volume : 25 ml
- Div. : 1/2
- Negative graduation : - 8 ml
- Color code : red
- Outer Diameter : 18.4±0.1 mm
- Total Length : 230±1 mm
- 3 pieces

- Shorty serological pipettes in transparent polystyrene
- The pipettes are shorter than standard ones, thus offering greater ease of handling. The compact size helps to reduce hand, wrist and arm fatigue. The presence of bidirectional graduations and negative graduations contributes to enhancing the precision of the pipetting operation. The color-coded system associated with different volumes makes the pipettes easily identifiable.
- Each pipette is equipped with a filter designed to prevent the accidental aspiration of liquids or foreign materials, thus protecting both the pipette and the sample from contamination.
- Thanks to their shorter design, they require less plastic and packaging material.
- Individually packaged in paper and plastic film.
- Sterility : sterility assurance level (SAL) of 10-6.
- Free of Bacterial Endotoxins
- BSE/TSE : does not contain any animal-derived materials.
- DNase/RNase Free : Tested by nuclease analysis and found free of detectable DNase/RNase contamination.
- Volumetric Accuracy - Serological pipettes have an accuracy of ≤ 2% at full
- Food Contact - Raw material complies with EC Regulation No. 1935/2004
- Filter - All pipettes are assembled with a high-quality filter.
- Graduation Ink - Resistant to contact with strong acids, strong bases and strong oxidants.

Units : 200
