

MAGENTA GA-7-3 and GA-7 VESSELS

For Plant Tissue Culture, Multiplication, Transport and Pre-Transplanting

FEATURES & BENEFITS:

- Induces rapid seed germination and easier inoculation and transfer.
- High relative growing area and low incubation shelving cost.
- Shape allows for improved stacking and saves space in autoclaving, shipping & storage.
- Excellent plant protection - no breakage or leakage.
- Autoclavable and reusable, resulting in low cost per plant.
- Minimizes contamination and the resulting profit loss.
- Easy operation and less handling when used with MAGENTA 7-Way Tray.
- Lightweight.
