Axygen[®] AxyPrep[™] MAG Viral Nucleic Acid Purification Kit

Product Information:

- The AxyPrep MAG Viral Nucleic Acid Purification Kit utilizes a unique paramagnetic beads-based purification system for the purification of viral nucleic acid from biological samples such as plasma, serum, ascites, cell culture supernatant, cerebrospinal fluid, and urine
- Simplified extraction process
- Compatible with genomics downstream applications
- High-quality, high-yield nucleic acid purification
- Manual and automation friendly

Applications

- PCR including RT-PCR and RT-qPCR
- Sanger and next generation sequencing
- Genotyping and SNP detection
- Gene expression

Prospecting

- Pharmas/Biotechs Government Testing Sites
- CROs Diagnostic Lab
- Academics

Target Customers:

- COVID-19 work (immediate focus)
- Any Viral labs (long-term focus)

Tools – in-progress

- Sell Sheet
- Applications Note
- Instruction for Use
