## Labcon U-Pette™

Labcon's U-Pette™ provides a quick and easy way to dispense blood into a test cassette without removing the cap from the collection tube. This greatly reduces the risk of infection due to aerosol exposure. Made of acrylic and stainless steel, U-Pette™'s flexible sides allow for efficient and precise delivery of required sample amount, whether it's one droplet or continuous flow dispensing. Labcon's U-Pette™ fits all standard blood collection tubes and is ideal for use with many point of care analyzers such as the Abbott® i-Stat® Helena® Abrazo® and other POC Analyzers that requires the delivery of a sample to a test cartridge or cassette.

Compliant with the IVD Directive 98/79/EC and lot tested Endotoxin (Pyrogen) Free.

i-STAT is a registered trademark of the Abbott Group of Companies

### Using the U-Pette™

**Grasp** center of the U-Pette™ at the side of the disc as shown.

**Insert** metal cannula through existing needle puncture of the capped tube.

**Invert** tube and place tip all the way into sample well until it reaches the bottom.

**Use** tabs to counter pressure and push down on tube to dispense sample as needed.
