

HIGHLY RELIABLE CRYOGENIC FREEZER WITH INDEPENDENT TRUE DUAL TECHNOLOGY PROVIDES THE BEST SECURITY FOR YOUR SAMPLES.

The cryogenic freezer offers a wide variety of research and long-term storage application for ultra low temperature scientific experiments, preservation of cells, DNA, bone material & bacteria.

#### ENERGY EFFICIENT

Arctiko's CRYO 230 freezer only uses 33kwh/24h which is extremely low compared with competitors.

The independent TRUE DUAL<sup>™</sup> technology ensures extremely low cost of ownership and noticeable impact on the runnings costs. Our CRYO is a superior alternative to LN2 needed, it operates solely on a power supply which lowers the operating costs.

## SUPERIOR PERFORMANCE

The dual cooling system is designed to keep the unit at -150°C, and with only one cooling system active the unit is still able to achieve -130°C – with an outstanding uniformity of

The TRUE DUAL<sup>™</sup> technology makes sure that you are provided with the best and most secure and reliable cryogenic freezers with excellent temperature stability and superior performance.

### MOST SECURE CHOICE

Arctiko's CRYO freezer eliminates the cost of LN2 storage maintenance and avoids hazardous operation conditions.

Arctiko's CRYO freezers are specially developed to avoid cross contamination and to provide a more environmentally friendly economic alternative to the LN2 cryotanks. Choosing this CRYO you will have one of the most reliable freezers available in
