

HyClone™ Dulbecco's Phosphate Buffered Saline (DPBS)

Balanced salt solution in liquid and powder form designed for diverse cell culture applications

Overview

HyClone™ Dulbecco's Phosphate Buffered Saline (DPBS) is a balanced salt solution designed for diverse cell culture applications. Available in both liquid and powder form in cGMP (21 CFR820) compliant and ISO9001 certified facilities.

- Certificate of Analysis included with product and available electronically for future reference.
- Standard stock items from 100 mL to 200 L (liquid) and 5 L to 50 L (powder); larger volumes available
- Powder form formulated and processed for rapid dissolution, are pre-weighted powders ready for hydration to 1X, and available in 3" ported funnel shaped containers upon request
- DPBS in 10X concentrations available in liquid form to meet specific needs
- Not for diagnostic or therapeutic use.

HyClone™ DPBS products are used for making isotonic solutions for cell or tissue rinsing, cell dilution, reagent prep, transportation etc. where maintenance of cell integrity is required for further manufacturing or research use.

Product specifications
HyClone™ DPBS liquid with calcium, magnesium, 500 mL (6/Pk)

Catalog code	SH30264.FS
Additives	With: Calcium, magnesium
Certifications/Compliance	Manufactured in cGMP (21 CFR 820) compliant and ISO9001 certified facilities
Format	Liquid
Shelf life	24 months
Sterilization	0.1 µm sterile filtered
Storage	15° to 30° C
