Akura™ PLUS Hanging Drop System

Unique Akura™ PLUS Hanging Drop System in a 96-well format with automation-compatible top-loading.

041-418900

Akura™ 96 Spheroid Microplate

Akura™ 96 Spheroid Microplate designed for lossless spheroid formation and handling as well as reliable cell culturing and analysis.

041-418901 et 041-418902

Akura™ 384 ImagePro

High-end solution plate that unifies robust liquid and spheroid handling with automated high-resolution imaging.

041-418903 & 041-418908

Akura™ 384 Spheroid Microplate

High-end solution plate that unifies high throughput screening with robust automation.

041-418904 & 041-418909

InSphero Incubox™

Edge effects due to media evaporation are a common problem in long-term cell culture, especially in busy labs with many projects in which incubator doors are frequently opened and closed. The Incubox™ creates a highhumidity microclimate inside conventional cell culture incubators and protects your sensitive plates from large humidity drops and fluctuations – the major cause for evaporation effects.

041-418900

Tilting Stand

Stable tilting of Akura™ Microplate for improved spheroid uniformity.

041-418906
